

Define Problem Statement

Date	18 th JULY 2026
Team ID	SWTID-2026-3524
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows

Problem Statement:

In a small project management team consisting of a Project Manager (Alice) and a Team Member (Bob), there is a need to efficiently manage project tasks and ensure accountability throughout the project lifecycle. The current system lacks clear role definitions, access controls, and a structured workflow, leading to confusion regarding task assignments and progress tracking.

The screenshot displays the SmartInternz Project Workspace interface. On the left, a sidebar contains navigation links: Dashboard, Internship, and Support. The main workspace is divided into two sections: 'Guided Project' and 'Project Workspace'. The 'Guided Project' section features a vertical list of steps: 'Optimizing User, Group, And Role Management With Access Control And Workflows' (highlighted in green), 'Users', 'Create Users', 'Groups', 'Roles', 'Table', 'Assign Users To Groups', 'Assign Roles To Users', 'Application Access', 'Access Control List', 'Flow', and 'Conclusion'. The 'Project Workspace' section contains a large text area with the title 'Optimizing User, Group, And Role Management With Access Control And Workflows' and a 'Problem Statement' section. The problem statement text reads: 'In a small project management team consisting of a Project Manager (Alice) and a Team-Member (Bob), there is a need to efficiently manage project tasks and ensure accountability throughout the project lifecycle. The current system lacks clear role definitions, access controls, and a structured workflow, leading to confusion regarding task assignments and progress tracking.'
